Notes: 3 combined PEG channels [breakdown unspecified]. \$1000/month is paid by TCI to the city for our rent in a city building. TCI is responsible for all maintenance of equipment. If they can't send someone to fix something (which they usually can't) we have our own consultant fix it and TCI pays the bills.

Notes: I-NET: TCI provides cable feed and satellite dishes for all schools. Schools are connected to an educational shared T-1. The franchise requires three channels, with provision for a fourth if use warrants. The public channel was returned to TCI for commercial use in 1989. The franchise requires that the cable provider will install an interactive return line to the public access studio upon request by the managing body. The quasi-governmental body holding the operating contract has refused to request the live line for 10 years. The franchise contains strict language preventing the public channel from any kind of commercial use or fund raising. No such restriction is placed on the governmental or educational channels. Live delivery capability to the public access studio has not been established. The public access studio is being closed. (The franchise says the operating body "may" establish a public access studio.) Two channels are being operated on the system, governmental access and educational access. The franchise-mandated public channel is dark.

Notes: At present we receive our funding from the general fund of the city of St. Helens in the amount of \$8500. We receive no other governmental support, franchise fees, or PEG fees. The balance of our \$30,000 operating budget comes from regular donations, specific program donations, and fund raisers. The approximate population of our viewing area is 25,000, and according to TCI there are about 4300 cable access hookups. Through an agreement with the cities of Rainier, Clatskanie, and Vernonia, we receive four hours per week of air on videotape which is shown on their community channels. We have also obtained a grant from the NCR to display the tapes, and none of these cities have a PEG office.

Notes: No I-NET required by current franchise; it "encourages" TCI to provide I-NET capability but does not require it. The current franchise requires TCI to complete a system upgrade by January 1998. The franchise does not require specific technology for the upgrade (like fiber), only that "at least 75 downstream video channels" must be available once the upgrade is completed. Significant monetary penalties can be imposed on TCI for failure to meet the upgrade deadline. Also, the franchise requires TCI to share 50% of the cost of leasing facilities for access. Because TCI does not house access, the city thought the lease cost-sharing provision was appropriate. Additionally the franchise contains a provision calling for "reviews" every three years to evaluate TCI's compliance and the continued effectiveness of the franchise given technological and regulatory changes. Upon the successful completion of each review, the city can grant a one-year extension of the franchise. The agreement could thereby be extended by up to five years, expiring in 2014. TCI has done an admirable job meeting the terms of the franchise since it took effect.
